December

Season and Months

Kindergarten Science Worksheet

Match the Months to their Seasons.

January

February

March

April

May

June

July

August

September

October

November

December

The image shows a matching exercise. On the left, there are twelve boxes containing the months of the year: January, February, March, April, May, June, July, August, September, October, November, and December. On the right, there are four circular illustrations representing the seasons: Spring (a boy watering flowers), Autumn (a boy with an umbrella in the rain), Winter (two boys playing in the snow with a snowman), and Summer (a boy swimming in a pool with a beach ball). Red lines connect the months to their corresponding seasons: January, February, and March are connected to the Spring illustration; April, May, and June are connected to the Autumn illustration; July, August, and September are connected to the Winter illustration; and October, November, and December are connected to the Summer illustration.
